NEWS RELEASE

IMV Projects Inc. announces new Vice President role for Integrity Management

IMV Projects' veteran Tom Fransham named Vice President, Health, Safety, Environment and Quality (HSEQ)

CALGARY, AB, 30 April, 2013 – IMV Projects, a Wood Group Mustang company, today announced the creation of a new vice president (VP) role within the company: Health, Safety, Environment and Quality (HSEQ). IMV Projects veteran Tom Fransham is the company's first VP, HSEQ.

"We now have a VP-level manager dedicated to technical safety and integrity management. We are delighted to have Tom Fransham in this new role. An IMV Projects veteran, Tom has considerable experience and is committed to technical safety engineering and occupational safety. On behalf of the entire team, I would like to congratulate Tom," says Kevin O'Brien, president, IMV Projects.

"I am very pleased to be in my new role at IMV Projects," says Tom Fransham, VP, HSEQ, IMV Projects.

"An area of particular focus [for me] is the Safety Leadership Programme (SLP), a Wood Group organization-wide intensive training initiative that reinforces safety leadership with a focus on process safety and integrity management. The SLP specifically details managers' responsibilities and offers strategies to create and sustain a corporate culture committed to safety across all operations. As one of IMV Projects' first participants, I can attest to the caliber of the SLP and to the unwavering commitment behind it. Last year, we sent 27 managers to the program. This year, we intend to send an even larger group. By continuing to take a leadership position on safety, we are contributing to the elevation of standards across our entire industry," says Fransham.

Tom Fransham joined IMV Projects in 2006 as Director of Project Services, and was later promoted to VP Engineering and Design/VP Quality Assurance. He holds a B.Sc. (mechanical engineering) from the University of Waterloo and an MBA from the University of Calgary. Fransham's professional accreditations include the Wood Group Engineering Excellence Program Team, APEGA, APEGS and APEGM.
