To: All IMV Projects Personnel

From: Ian Beach, IMV/Enbridge Relationship Manager

Subject: New Work with Enbridge

We are very pleased to announce that IMV Projects has signed an agreement with Enbridge Pipelines Inc. to provide engineering design services and technical assistance to Enbridge Pipelines Saskatchewan Inc. (EPSI). The work consists off several pump station upgrades for their EPSI Phase 2 Expansion Program. Frank Lauer will serve as Program Coordinator for this multi-discipline detailed engineering work which will be executed as a series of smaller projects within our Sustainable Projects Group.

Sincere thanks are extended to all of the IMV Projects personnel who worked closely with Enbridge representatives during the proposal stage and made this award possible. We look forward to developing a long-term relationship between Enbridge and IMV Projects.

Ian
