ADGAS (Abu Dhabi)
PMC Contract

We are very pleased to announce that *IMV Projects Middle East* has been awarded a major Project Management Consultancy (PMC) contract by ADGAS of Abu Dhabi. This contract is 40 months in duration and we are very excited to be selected by ADGAS as the single-source for this PMC work.

IMV Projects Middle East will provide consultancy services for a major instrumentation and controls upgrade for ADGAS's gas storage and loading facilities. The upgrade will be from ADGAS's existing conventional control system to Honeywell Experion (PKS). IMV's PMC team includes Clem Oscienny (Project Manager) and John Hunt (Senior Instruments Engineer), both recently relocated to Abu Dhabi from the Calgary office, and Dennis Boyle (Senior Controls Engineer).

I am sure the whole team will be nicely tanned next time you see them. We wish them all the best!
