## IMV Mustang Atlantic Offers Full EPCM Services to Canada's East Coast

**St. John's, Newfoundland, February 23, 2009** - IMV Projects Atlantic ("IMVPA") and Mustang, both part of international oil and gas services company John Wood Group Plc ("Wood Group"), are pleased to announce a new collaborative effort. IMV Mustang Atlantic will be headquartered in St. John's, Newfoundland, and will provide a full suite of engineering, procurement, and construction management (EPCM) services to Canadian East Coast clients.

IMV Mustang Atlantic will offer services in the Atlantic region of Canada. Services will be related to offshore floating facilities, offshore fixed facilities, topsides, onshore facilities, and onshore pipelines, among other services. An IMV Mustang Atlantic solution is scalable to fit the client's needs.

###

**IMV Projects Atlantic** ("IMVPA") is a project management, engineering, procurement, and construction management (EPCM) company specializing in oil and gas engineering services for offshore, arctic and harsh environments. Based in St. John's, Newfoundland, IMVPA offers a range of multidiscipline EPCM services to domestic and international clients, including some of the most innovative and groundbreaking frontier projects in the industry. IMVPA will continue to offer services related to research and development, subsea engineering, arctic engineering as well as engineering services outside of the Atlantic Canada region.

**IMV Projects**, founded in 1999 and headquartered in Calgary, Alberta, has 525 employees and operations in western and northern Canada and the Atlantic coast of Canada. IMV's core expertise is in engineering and construction management, and the company provides hands-on experience and proven expertise for conventional and in-situ steam-assisted heavy oil developments, including steam-assisted gravity drainage (SAGD), cyclic steam stimulation (CSS) and vapor extraction (VAPEX).
