IMV Projects and Mustang Automation Contract

A recent development that we're particularly proud of is the award of a major automation and controls contract in Alberta to one of our Wood Group sister companies, Mustang Automation of Houston. IMV Projects was an integral part of their bid and we will be providing expertise to their client as part of this contract.

Not long after Wood Group's acquisition of IMV Projects in late 2007, we saw an opportunity to leverage Mustang's reputation in automation and controls and build our own knowledge and expertise in this area, as well. This award is the first time that IMV Projects and Mustang have collaborated successfully in our Western Canadian market and demonstrates how both parties were able to bring different things to the table for the benefit of the client.

For more information on this award and other Automation and Controls enquiries, please contact Mike Voloshin at 403-537-8811.
