**Re: ConocoPhillips Canada**

**SURMONT 1 – Facility Support, De-bottlenecking & Maintenance Projects**

IMV Projects is pleased to announce that we have been awarded an on-going engineering contract with ConocoPhillips Canada at Surmont 1 for maintenance and facility support projects. We have kicked off eight projects already and Tarek's team is transitioning from the Suncor Firebag projects to this work with CPC at Surmont 1.

IMV Projects has been very active with ConocoPhillips for the past five years providing significant input on Surmont 1 and 2. As well, for the last two years, IMV has been executing early planning for Surmont 3.

We are excited to have this opportunity to expand our valuable relationship with ConocoPhillips. They continue to place very high value on the level of expertise we have been providing them. We sincerely thank all IMV Team members that have made this vote of confidence by one of our major clients possible.

Sincerely,

Logan Lesyk, B of Mgt.
